

TEMPUS PROJECT

HUman-TOol interaction Network

WP1

Setup of the Web based training network in RS that enables realization of the new interdisciplinary and multidisciplinary curriculum

WP1 official title: Development and maintenance of the network and forming of the core of experts for the delivery of the curriculum leading to the specialist degree

October 16-18, 2014 - University of Genoa

Goals

1. Construction and delivery of Web based training environment

Provide a set of modules and tools that use a unified internal data structures and well-defined set of network based operations applicable to such data structures.

2. Enable synchronous and asynchronous communication among distributed teams and team members

Discussion forums, document sharing, training sessions, chats, presentations and other "e-learning" and "knowledge management" interactive platforms.

3. Recording and mapping of all generated learning materials (video and audio recordings, generated documents) in centralized data storage.

WP1 Activities

Network structure development

Review of the existing laboratories, IT hardware and software and defining improvements

Setup of the Demonstration and Training Centre

New training Web services development

Creating and maintaining the project interactive Web portal

6

Network startup and maintenance

European Commission

TEMPUS

TEMPUS PROJECT
HUman-TOol interaction Network

Finished activity

End date: April 15th

1

Network structure development

Corrections according to reduced budget

Current status: defined network architecture

1. Expert analysis and review of existing laboratories and new network "must-have" has been done with Serbian partners
2. Each partner has analyzed its IT network and made a "must-have" specification
3. Each specification contains from next categories:
 - a) computer equipment
 - b) communication equipment
 - c) video equipment
 - d) office equipment
 - e) laboratory equipment

Current activities

6

Startup and maintenance

Current status:

1. Maintaining the project Web portal
2. Adding new features
3. Database optimization
4. E-learning customisation
5. E-learning audio/video live streaming platform customisation
6. Preparing new courses
7. Preparing access rights and roles

E-learning pages of the project web portal

The screenshot shows a BigBlueButton presentation interface. The main slide content is as follows:

TEMPUS PROJECT
HUman-TOol interaction Network

WP1

Setup of the Web based training network in RS that enables realization of the new interdisciplinary and multidisciplinary curriculum

WP1 official title: Development and maintenance of the network and forming of the core of experts for the delivery of the curriculum leading to the specialist degree

Human-TOol interaction Network - HUTON

The interface also includes a 'Users' panel on the left with one user 'Milovan Maric (you)', a 'Webcams' panel with a video feed of the same user, and a 'Chat' panel on the right with a welcome message and various instructions. The bottom of the interface shows navigation controls and a language dropdown set to 'English'.
